DETAILED ACTION

Allowable Subject Matter

Claims 1-13 and 17-37 are allowed.

The following is an examiner's statement of reasons for allowance:

As for **claim 1**, the prior art does not teach or fairly suggest the use of a vibration isolator that prevents an image blur due to a vibration of a camera by moving a correcting optical system, the vibration isolator comprising a vibration speed determining device that determines a speed of the vibration, a differentiating device that differentiates the speed determined by the vibration speed determining device, an integrating device that integrates the speed determined by the vibration speed determining device, *a correcting device that corrects the integrated value calculated by the integrating device to substantially zero when the differentiated value calculated by the differentiating device is substantially zero* such that an unwanted component of the vibration speed is substantially eliminated during image blur prevention, and a controlling device that controls a position of the correcting optical system according to the integrated value to thereby prevent the image blur due to the vibration of the camera.

As for **claim 20**, the prior art does not teach or fairly suggest the use of a vibration isolator that prevents an image blur due to a vibration of a camera by moving a correcting optical system, the vibration isolator comprising a vibration acceleration determining device that determines an acceleration of the vibration, an integrating device that twice-integrates the acceleration determined by the vibration acceleration

determining device, *a correcting device that corrects the twice-integrated value calculated by the integrating device to substantially zero when the acceleration value determined by the vibration acceleration determining device is substantially zero* such that an unwanted component of the vibration speed is substantially eliminated during image blur prevention, and a controlling device that controls a position of the correcting optical system according to the corrected twice-integrated value to thereby prevent the image blur due to the vibration of the camera.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
